

"NATMAT"

Manufacturers of Western Red Cedar
Window and Door Components

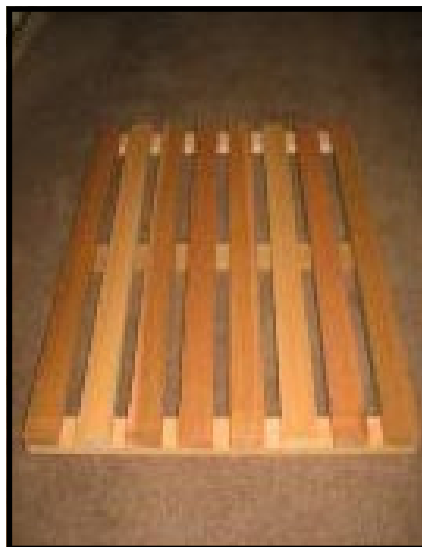

AN EXCITING NEW PRODUCT

National Cedar Componentry, has produced the unique "Natmat". A well designed Western Red Cedar bath mat that will add warmth and beauty to any bath room.

Western Red Cedar has a natural resistance to rot and decay and being manufactured with stainless steel fixings, will prevent oxidisation that can stain floors and the timber itself. The "Natmat" will provide protection for the floor as well as the feet and will prevent dangerous slipping on wet tiles and other fibre bath mats.

The slats are raised to allow natural air flow to dry the floor quickly and prevents bacteria from flourishing. Wooden bath mats endure longer than other fibre bath mats.

Lightweight and durable "Natmat" can be used indoors and out and can have a variety of functions. Not only are they great in the bathroom to add warmth and colour but they can be used as racks for indoor or decking pot plants.

For your nearest distributor or outlet please call our friendly customer service centre on (02) 44 23 3100.
